First Annual Production Sale
Wednesday, March 1, 2017 • 1 p.m.
186 Rapelje Road Columbus, Montana

L-W WELCOME

It is our pleasure to welcome you to the inaugural L Bar W Cattle Company and Sidwell Ranch production sale. We are excited to present an outstanding set of horned and polled Hereford genetics.

This year's offering represents the top 75% of our 2016 calf crop. There is a large selection of ½ brothers and 40% of our offering are ET calves. We think it is a superb set of yearling and 2-year-old bulls. We have purchased top end genetics the last couple of years from Cooper Herefords and Holden Herefords, the top Line One breeders in the US, and Churchill Cattle Co. These young bulls reflect these genetics.

These bulls combine the most powerful and breed leading genetics found in the Hereford breed today. Whether you are looking for performance, calving ease or bulls that produce quality replacement females, we have a selection built to meet your needs.

All bulls will receive a breeding soundness exam and semen test prior to sale day. Yearling weights and scrotal measurements will be posted on our website www.lbarw.com by 15th of February.

We look forward to seeing you on the February 28 to view the offering and on March 1, 2017 for the sale and lunch.

Please feel free to contact us regarding any questions about our offering.

Thank you for your support.

Carl and Denise Loyning
Mike and Jeannette Walen

LS

Richard and Becky Sidwell would like to welcome you to the inaugural L Bar W and Sidwell Ranch production sale. We ranch in Columbus, Montana, raising registered Herefords. Sidwell Ranch was established 27 years ago. Richard started in the Hereford business 61 years ago when his father and grandfather gave him a heifer calf. That started an intense interest that has continued to the present.

We are very excited to present this offering of Sidwell Ranch bulls. These bulls have been raised on mom's milk and native grass. We are passionate about raising sound, functional bulls that will work in anyone's program. The sires of these bulls, Bingo 329, Rawhide 201 and SR Loadup 1012, are out of some of the top genetics in the nation.

We strive to produce Herefords with fertility, calving ease, fast growth and strong carcass traits. The cattle need quality and eye appeal. It is with this thought that we provide genetics that will be profitable for our customers.

If Richard or I can help in any way, please call. Please join us to view the cattle on February 28 and join us on March 1, 2017, for the sale and lunch at our sale barn north of Columbus.

Thank you,

Richard and Becky Sidwell

Balanced Genetics

Wednesday, **March 1, 2017** – 1:00 p.m (MST)

Sidwell Sale Barn, Columbus, MT

Lunch will be served starting at 12:00pm

Sale Location

The sale barn is located at 186 Rapelje Road, North of Columbus, Montana on MT Hwy. 306. Columbus is 45 miles from Billings, MT and 90 miles from Bozeman, MT via I-90

Viewing

Sale Cattle will be on display starting Tuesday the 28th thru sale day. The offering will be sold via video by Cattle in Motion. A copy of the video will be available after February 1, 2017 by contacting us or see it at cattleinmotion.com or www.lbarw.com

Sale Day Phones:

Carl Loyning.....406-425-2484
Denise Loyning.....406-425-2252

SALE TERMS & CONDITIONS

Terms:

Terms of the sale are cash unless prior arrangements have been made. Every lot will be sold to the highest bidder with the auctioneer settling disputes as to bids. All cattle are the buyer's property as soon as sold. All announcements made from the auction block on sale day by the owner or auctioneer will take precedence over statements in the sale catalog.

Guarantee:

Bulls selling are guaranteed for the first breeding season. Every animal in this sale is, to the best of our knowledge, free from any disease or defect. All animals are guaranteed breeders. If an animal fails to breed after a period of six months, it may be returned to the seller in good condition and in compliance with Montana Health Regulations. The seller reserves the right to try said animal for six months and if it proves to be a non-breeder, either an animal of comparable value will be substituted or credit will be given in a future sale on an animal for animal basis. All pregnant females are considered breeders. No other warranty of any nature is express or implied.

Health:

Each bull will pass a semen test before leaving the ranch. The health of the herds is excellent. We guarantee that all sale cattle will be able to ship to any state or Canadian province. All females are officially calf hood Bangs vaccinated. All cattle are on a pre-conditioning program and herd health program.

Additional Information:

Scrotal Measurements, updated EPD's and Yearling weights will be available sale day.

Feed Arrangements:

Bulls will be fed until April 1 at no cost. After said date, buyers will be charged for feed until delivery.

Delivery:

Free delivery within 500 miles. Additional delivery beyond 500 miles will be charged at cost to central points anywhere in United States. For Canadian buyers, we will deliver up to nearest points of entry. Reputable purebred livestock haulers will be contracted for delivery.

Liability:

All persons attending the sale do so at their own risk. Neither the owners nor any person associated with the sale assumes any liability, legal or otherwise

EXPLANATION OF BREED EPDS

Calving Ease — Direct (CED)

EPDs are based on calving ease scores and birth weights. More positive EPDs are favorable and indicate easier calving. The EPD for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

Birth Weight (BW)

The BW EPD is an indicator of birth weight and calving ease. Progeny sired by a bull with a BW EPD of 2.2 can be expected to weigh 3.2 lb. more at birth, on average, than progeny sired by a bull with an EPD of -1.0 lb. (2.2 minus -1.0 = 3.2 lb.) Birth weight is another indicator of calving ease. Larger BW EPDs usually, but not always, indicate more calving difficulty.

Weaning Weight (WW)

The WW EPD reflects pre-weaning growth potential. Measured from adjusted 205-day weight. It is an indicator of direct genes for growth independent of milk production of the dam. Calves sired by a bull with a WW EPD of 30 should have a 20 lb. advantage in 205-day adjusted weaning weight compared to calves sired by a bull with an EPD of +10 lb. (30 minus 10.0 = 20 lb.)

Yearling Weight (YW)

YW EPD for a sire with an EPD of 87 indicates that on average, his progeny should be 30 lb. above the average of progeny of a bull with an EPD of 57 lb. YW EPD reflects differences in the 365-day adjusted yearling weight for progeny. It is the best estimate of total growth.

Maternal Milk & Growth (M+G)

The M+G EPD is a combination EPD. It is the MM EPD plus ½ the WW EPD. It has no accuracy value since it is simply a combination of two other EPDs. A sire's MG EPD reflects what he is expected to transmit to his daughters for a combination of both growth genetics (WW EPD) and maternal production (MM EPD). This EPD is sometimes referred to as "total maternal" or "combined maternal."

Maternal Milk EPD (MILK)

The MILK EPD is a prediction of weaning weight differences due to milk and maternal ability of the dam. For a sire, the MILK EPD predicts the maternal ability of his daughters expressed in pounds of calf weaned. MILK EPDs do not specifically predict pounds of milk produced, but pounds of calf weaned due to maternal production of the dam. It predicts the difference in average weaning weight of sires' daughter's progeny due to milking ability. Daughters of a sire with a MILK EPD of 14 should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MILK EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production over the entire lactation period.

Scrotal Circumference (SC)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen

quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPD suggest younger age at puberty. Yearling sons of a sire with an EPD of 0.7 should have yearling scrotal circumference measurements that average 0.7 cm. larger than progeny by a bull with an EPD of 0.0. In this genetic analysis, a multiple-trait model was used for scrotal circumference. Weaning weight was used as a predictor variable to increase the prediction accuracy of SC EPDs. Therefore, an animal with a weaning weight EPD should also have an SC EPD.

Ribeye Area (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measures based on ultrasound measurements of live yearling cattle. Sires with relatively higher REA EPDs are expected to produce better muscled and higher percentage yielding slaughter progeny than will sire with lower REA EPDs.

Marbling (MARB)

MARB EPDs reflect differences in an adjusted 365-day intramuscular fat (marbling) score based on ultrasound measurements of live yearling cattle. Breeding cattle with higher MARB EPDs should produce progeny with a higher degree of intramuscular fat and therefore higher quality grades.

Certified Hereford Beef Index (\$CHB)

This is a terminal sire index that is built on a production system where Hereford bulls sire calves for the CHB market. There is some pressure put on CE and then positive weight on both WW and YW. Remember that all offspring in this index are harvested, so they need to be born alive and then grow fast at all stages of life. Of course, we have much more emphasis on fat in this index, as we want the cattle to stay lean. There is also a significant weight on both REA and IMF with more emphasis again on IMF. This index would be used by producers who have a target of producing bulls for a terminal breeding program. It could be used heavily in the Midwest where bulls are used in rotational breeding programs to produce cattle in a retained ownership program or are simply sold to backgrounders. This is the only index that has no emphasis on fertility. Remember that nothing is retained in the herd.

There's Never Been a Better Time to Capitalize On the Value of Using Hereford Bulls on Your Angus Based Cowherd.

Using Hereford bulls on Angus-based cows will give producers advantages in profitability, cash flow, herd size, and retained female fertility and longevity according to a recently completed study at Circle A Angus Ranch. In fact, when the data was further analyzed for economic emphasis, the results showed an advantage of \$514 net per cow over a period of 10 years. That's a \$51 difference per cow per year.

Economic models also predicted that if replacement females are retained over a period of 10 years, Hereford-sired females will generate a 20% advantage in herd size for the same relative cost versus the straight Angus commercial cows because of increased fertility and longevity.

Cattle In Motion

This sale will be broadcast Live on www.CattleInMotion.com. To view a sale, 1. Create an Account, if you have already done so skip to next step. To create a new account, click on the words Create New Account at the top right hand side of your screen. You must fill out the information with a red asteric next to it. Then Click Create new account. You are logged in if you see in the upper right hand side of the screen My Account and Log out.

2. Under upcoming events you will need to click on the event you are wishing to watch. 3. Scroll down the page Under the section that says Process to Bid Online, CLICK THE WORDS COMPLETE LIFETIME VERIFICATION.(Clients only need to complete this one time) You will be directed to CIMs shopping cart page. Then click add to cart, then click check out and enter credit card info. 3. Click on the Sale under upcoming events, then scroll to bottom of the page, to the sign up area. You must enter your phone number and click I agree to sale terms and conditions. Then

below the sign up area, on the day of the sale there will be a click here to enter auction button. Click the button and that will take to you to the sale.

Mo Sowards

Kate Bursley

To our Friends:

Thank you for all you do for us and making this program a success.

To our Families:

Thank you for always being available to lend a hand when needed,
for giving us the foundation to pursue this dream,
and your unconditional love and support.

FS

Thank you to all past and present customers and
to everyone that has made this possible.

Our deepest and sincere thank you to all.
